

Ape Case Tablet Stand Set-Up Instructions

1. Pick up the stand. Place your thumbs in the center on the small black tab that has the "power on" symbol on it. Push on that piece that is under your thumbs. A bar and base should expand out.

2. With one hand holding the upside-down "u" shaped piece, have your other hand retract the bottom piece that you pushed out to lay flat on a surface.

3. The bar may fall into a groove, which you can adjust by lifting and placing into the desired slot. Once in the desired spot, press down on the bar until it clicks into place.

Your stand is ready to use. Place tablet in portrait or landscape view.
